Welcome

On behalf of the Organising Committee, we would like to welcome you to the National Infrastructure Conference. Now in its 9th year, it is the only conference that is focused entirely on tax issues impacting infrastructure, and will be held once again at Crown Sydney from 13-14 June 2024.

There have been significant changes in the global and Australian economic and tax landscape over the past year. We have seen heightened international conflict and the fight against inflation and higher interest rates. We have seen increased focus on easing cost of living pressures, which led to modification of Stage 3 personal tax cuts and a continued focus on multinational tax measures and corporate tax governance.

This year's program will again provide an outstanding array of speakers and topics. Antony Steinberg (RBC) will deliver a keynote address on the Australian infrastructure market. Aaron Bennett and Steele Broderick will deliver the ATO keynote address.

This year we explore further the topical areas of thin capitalisation reform and Taxable Australian Real Property (TARP), which are areas of particular significance to the industry. Eugene Wheelahan KC, CTA, and Mia Clarebrough will also present on the emerging issues around transfer pricing and debt/equity.

A highlight will be hearing from the array of experienced participants in the panel sessions dealing with investor competitiveness, regimes relevant to institutional investors and issues around private capital.

A networking function will provide ample opportunity to catch up with colleagues from the industry, including professional firms, corporates and the public sector.

We look forward to seeing you in Sydney in June.
